Profile

I make independent concept launch films for software products in After Effects, rebuilding each interface and animating every shot, sound included. I also build software in TypeScript and React, currently framecatch, a screenshot and recording tool for Windows. Open to freelance film work and part-time internships alongside school.

Selected work

Hoplite, Concept film, independent, 2026
A 32 second launch film for Hoplite. Rebuilt the interface and animated every shot, sound included.
After Effects. oskarpajka.com/work/hoplite

BridgeMind, Concept film, independent, 2026
A 30 second square film for BridgeMind's BridgeSpace and BridgeVoice.
After Effects. oskarpajka.com/work/bridgemind

framecatch, Screenshot and recording tool for Windows, in progress, 2026
Built with Patryk (github.com/Explosivera).
Electron, React, TypeScript. github.com/Common-Branch/framecatch
